

The THEMIS Mission

by James Burch; V Angelopoulos

[edit]. From February 15, 2007 until September 15, 2007 the five THEMIS satellites coasted in a string-of-pearls orbital. Launched in 2007, THEMIS is a 2-year NASA mission consisting of 5 identical satellite probes that will study the violent colorful eruptions of Auroras from our . NASAs THEMIS Mission Tracks Space Weather & the Magnetosphere NASA THEMIS Mission The Big Picture Mars Odyssey Mission THEMIS Jul 24, 2008 . Five NASA satellites from the THEMIS mission were recently able to closely witness the chain of events that occurs to create the northern lights New features of electron phase space holes . - ResearchGate Go OnBeyond and discover technology for robotic monitoring of the nations borders, explore a new NASA mission to understand Earth-Sun interactions, learn . THEMIS Overview NASA Feb 20, 2013 . Earth is surrounded by a giant magnetic bubble, called the magnetosphere. Over six years in space, five spacecraft from the THEMIS mission Spaceflight Now Delta Launch Report THEMIS mission overview
